Profile

Software Engineering undergraduate with a technical background in Electronics and hands-on experience in web applications, academic projects, and software development for a client. Interested in understanding user and business needs and contributing throughout the development of websites, systems, and products, from initial concepts to implementation, maintenance, and improvement. Experience with React, TypeScript, PHP/Laravel, and relational databases.

Professional Experience

Instituto Habilittare Curitiba, Brazil
Software Development — Client Project *Aug 2026 – Present*

- Collaborate on software development for a psychology and neurology clinic, covering an institutional website and a clinical management platform.
- Participate in stakeholder meetings to understand administrative workflows, gather requirements, and define priorities for incremental delivery.
- Develop interfaces with React, TypeScript, Vite, and Tailwind CSS within a project using a Laravel backend and a PostgreSQL database.
- Contribute to documentation, interface prototyping, and the organization of a shared development environment with Docker Compose.

Selected Projects

Papyrus — Study Organization Platform Academic Project
Collaborative Software Development *2025 – Present*

- Collaborate on a platform for organizing academic routines, including subjects, tasks, study materials, and calendar events.
- Develop and integrate React interfaces with a PHP API, using MySQL and PDO for data persistence.
- Implement authentication, session validation, and user management operations.
- Participate in feature integration, version control with Git, conflict resolution, and software verification activities.

Personal Portfolio Personal Project
Frontend Development *2026 – Present*

- Develop a portfolio with React, TypeScript, Vite, and Tailwind CSS, organized into reusable components, layouts, and sections.
- Implement internationalization with i18next and react-i18next, using Brazilian Portuguese as the initial language and preparing the application for additional locales.

Education

Pontifícia Universidade Católica do Paraná (PUCPR) Curitiba, Brazil
Bachelor's Degree in Software Engineering — In Progress *Jan 2025 – Expected Dec 2028*

Federal Institute of Paraná (IFPR) Curitiba, Brazil
Technical Diploma in Electronics with Secondary Education *Completed*

Technical Skills

- **Frontend:** JavaScript, TypeScript, React, Vite, Tailwind CSS, i18next, and react-i18next.
- **Backend and Databases:** PHP, Laravel, SQL, PostgreSQL, MySQL, PDO, relational database modeling, and HTTP/JSON APIs.
- **Development Tools:** Git, GitHub, Docker, Docker Compose, Linux, VS Code, Composer, and npm.
- **Software Practices:** Requirements elicitation, workflow analysis, interface prototyping, functional testing, documentation, and collaborative development.
- **Additional Background:** Java, C/C++, VHDL, ESP32, and embedded systems.

Languages

- **Portuguese:** Native.
- **English:** C1 — EF SET Certificate (CEFR).
